

Non-technical, business-focused course delivery

Relevant legal and regulatory risks

Guidance on appropriate standards and certifications

Immediately usable collateral

Delivered by leading global practitioners

# GCHQ CERTIFIED TRAINING

Certified Training

The GCHQ Certified Training scheme certifies high quality training courses that deliver practical, high value guidance to organisations.

The Cyber Security and Privacy Essentials training course material and trainers have been benchmarked against GCHQ'S rigorous standards based on the relevant areas of the IISP Skills Framework that underpins the GCHQ Certified Cyber Security Master's degrees.

This course is CPD accredited which means that delegates who complete the course can use their attendance within their CPD portfolios.

## COURSE CONTENT

- Understand who is attacking you and why.
- How to develop a cyber security strategy and develop a cyber-safe culture within your organisation.
- Understand the legal and regulatory requirements that affect organisation security policies and where to find resources.
- How to audit your current processes and procedures to identify weaknesses.
- What to do when you are breached including preserving evidence, communicating with your staff, customers, suppliers and authorities.
- Understand the various cyber security frameworks and establish which are the most appropriate for your organisation.
- How to keep your organisation and employees cyber safe.

“I was coming from a very low knowledge base and am not a “techie” so it was perfectly pitched to increase my awareness.”

*Susan Cordingley, Director of Planning & Communications, National Council for Voluntary Organisations (NCVO)*
